

***COMPETITION ASPECT: ESSAY***

***‘PEACE! PEACE! PEACE!!!’***

A virtue of human greatness, a factor of love and unity, the weapon that defeats war among humanity. The power of freedom.

To begin, peace in the province of our early Cameroon was a form of happiness and joy, in our hearts, freedom was in our hearts, you could move to any town of Cameroon without any form of fear in your heart, children were free to go to school enjoying their wonderful attire, peace could work for the land of Cameroon and success and greatness prevail among all, but when peace went on an exile, humans change from being a human being. Where hatred grows in our hearts, brother killing his brother, children facing their parents with guns and parents facing children with guns, death became the order of the day, disunity and lack of trust is the Bell in our hearts toward one another. Children no longer go to school and hopeless future is what we see. Because peace has gone on exile. Then to conclude, we need to love peace, speak peace preach peace, and shout it as a trumpet to the hearing of all inhabitants of the land. To the rebuilding of all we have lost and for the hope of a great future.

Thanks Ubuntu our way. Peace!!
