

*MUGHA Melvis*

I wish to thank change communications for given me the opportunity to be part of their trainees. The workshop was really an eye opener to me. It has changed my reasoning and believes alot. I used to believe in every news I see on social media but today, thanks to change communications I know fake news is real and it can destroy us and our community. When I see or hear about a news I will always verify the source to be sure before confirming and I have taught my friends and family to do same because fake news can lead to imprisonment and it can even kill.

Also, I learned how to live in peace with my neighbors by avoiding things that will make them angry. I'm trying to promote living together in my community by advising people to avoid hate speech. Hate speech can destroy the peace in our community leading to violence and even death.

Today i used my phone to talk about peace with my friends all over the world.
