

YOH K. BRAIN

First and foremost, I would like to appreciate Change Communications for a good job. The fact that Change Communications has gone a long way to preach peace to many communities contributes in making the world a better place. I really appreciate. It is thanks to the Ubuntu family through Change Communications That I learnt how important peace is. Freedom in tranquilly is necessary. I learned that a peaceful community is a quiet one.

Secondly, the Ubuntu family through Change Communications has taught me on how to use my phone and preach peace. At first I never really knew someone could use his phone to preach peace, but today I know how to use my phone to preach peace. I Can post on social media - Facebook, WhatsApp, talk to friends in groups about peace given the fact that a good number of people in the world now use social media. All of that is thanks to change communications.

The Ubuntu family through Change Communications opened my mind to understand the Importance of staying in a community where there is peace, the Ubuntu family made me to understand that in a community where people are free together there are a lot of advantages such as free communication, togetherness, and love because it is not only a question of living together, but of being free together and that is what makes humanity.

Thanks to Ubuntu family through Change Communications, I have become a better person.
